STREAMLINED GLOBAL DISTRIBUTION

SUSTAINABLE MATERIALS AND PRODUCTION

FLEXIBLE PRODUCTION & CUSTOM CAPABILITIES

LEADING DESIGN AND ENGINEERING

PLIMODE

Plimode is much like a well-tailored suit, a rare weave of elegance and fitted comfort. The back's supportive inner mesh layer and advanced synchro-recline, hide the comfort of a task chair in an exquisitely slim silhouette. The meticulously curated fabric offerings suit even the most discerning tastes. Plain knit, herringbone, hopsack and leather come in 33 sophisticated colors. With custom fabric capabilities and several other styling options, Plimode is bespoke to precisely fit any office environment from casual to a luxe.

CHORAL

With a design as exquisite as it is ergonomic, Choral is a favorite for both designers and end-users. Adjust the full scope of ergonomic functions comfortably from your seat. Lumbar support and seat tension adjustment slides let you quickly finesse the fit for personal support. Choral's elegant form is complimented by polished metal detailing and a refined color palette.

SYLPHY

Sylphy's mesh back cradles you as the supple frame conforms to your body and posture. Beyond all standard adjustments, Sylphy features back curve, forward tilt, and 3D arm adjustments, for an absolute custom match to any body type and work mode. Its playful take on modern design makes Sylphy fit various interior styles.

PORTONE

The pliable frame harmonizes with your body movement and adaptively supports your posture. And the beautifully integrated, adjustable lumbar support comfortably contours the curves of your back. All available in fully neutral tones or with a tasteful seat color accent in several design-forward fabrics.

REPIROUE

Allowing a perching stance, Repiroue brings the hips forward creating a healthy s-curve in the spine. The stool aims to support active work places as one of the first seating options to complement height-adjustable tables. Its support column swivels and tilts 10° with the body in any direction, emulating the comfy, energizing bounce of a stability ball (but more ergonomic). The height is easily adjusted from 22 ¼" - 32 ½" by an omni-directional lever that runs under the circumference of the seat.

SW

More freedom, more activity, more style. The SW collection of height-adjustable tables is intelligently designed and beautifully crafted to elevate office activity and aesthetics. SW features sweeping comfort-sloped edges, matte high-pressure laminate, and concealed wiring — style and comfort in every detail.

www.okamura-us.com/r/sw

TRAVERSE

An incredibly thin tabletop seems to float over a pair of exquisitely canted legs, bringing a simple, yet profound presence to the conference room. Wiring is concealed in the legs, supplying power to tech cradles discreetly tucked under the tabletop — in reach but out of sight. Robust support, veiled in ethereal beauty.

ALT PIAZZA

Alt Piazza is a café-style collection of bars, tables and seating that creates supplemental workspaces for light work and casual meetings. Okamura developed Alt Piazza to support the values of the emerging workforce, encouraging open collaboration and natural-being. The collection is finished with the texture and aesthetic of reclaimed wood in a low-maintenance, durable laminate. Luxurious touch-sensored lights are centrally positioned with power outlets located under the bar top.

MUFFLE

Muffle is a modular system of panels, sofas, desks, and shelves that transforms open spaces into cozy concentration zones. The sound-dampening panels double as visual screens, reducing distractions to facilitate both individual and group productivity. With a vast array of applications, designers can create several distinct settings with one beautifully cohesive office aesthetic.

5° GO-DO

Find some Zen in a busy workplace. 5° GO-DO pairs exceptional acoustics with exquisite design. The beautiful felt exterior is reinforced by internal wadding, effectively absorbing most speech frequencies (.75 NRC value). The minimalist design doubles as a tasteful, artistic wall accent. Magnetic backing allows several non-adhesive, non-destructive installation options.
